Description

Shadows Over Oranges is an original acrylic painting by Mary Grace Tracy that blends still life with pattern and architectural abstraction. A bowl of oranges anchors the composition, set against layered surfaces of geometric texture and shifting shadows that suggest an interior space shaped by light and time.

Painted in acrylic on canvas, the work juxtaposes cool blue-gray tones with warm orange hues, creating visual tension and balance. Repeated motifs and graphic marks echo Tracy's interest in rhythm and surface, while the fruit introduces a familiar, grounding presence.
